

Phase 2 Completion Letter

LAGNAF™ Network LLC | AUTOAPPEAL™ | Phase 2 Completion Package

Purpose

This package is the Founder-prepared Phase 2 completion handoff for Jason Manuel / Chaotically Organized AI LLC to complete the AUTOAPPEAL™ Apollo Build™ Phase 2 architecture under LAGNAF™ Network LLC.

Phase 2 Completion Standard

Jason is being provided the operating structure, integration checklist, placeholder credential templates, deployment controls, QA acceptance checklist, and Red Vault™ security expectations necessary to complete Phase 2 successfully.

Actual production credentials are intentionally not embedded in this zip. The Founder will enter credentials into the included fill-in templates or directly into the approved deployment environment.

Founder Direction

Complete Phase 2 integrations only within the approved scope. No production go-live, domain connection, DNS modification, or infrastructure change is authorized without written Founder approval.

All system credentials, API keys, account ownership, production hosting, DNS, GitHub, Vercel, CRM, treasury, and final deployment approval remain Founder-controlled infrastructure.
