

Vercel Environment Setup

LAGNAF™ Network LLC | AUTOAPPEAL™ | Phase 2 Completion Package

Instructions

Add environment variables through Vercel Project Settings only.

Do not hard-code secrets in source files.

Set production, preview, and development values intentionally.

Redeploy after environment variables are added or changed.

Validation Checklist

Build succeeds after env entry

Server-only variables are not exposed in frontend

Demo password changed from default before production review

Missing variable errors display safe messages only
